## RESUMEN

---

The **BL983322** is a compact, panel mounted, process controller for measuring electrolytic conductivity (EC) of a process stream. The device features a large LCD with protective cover. Users may choose from automatic or manual dosing modes. When in automatic mode the dry contact relay is activated when a reading is **above the set point**. The relay can be used to activate a solenoid that switches from one DI (deionized) tank to another or to open a valve that will allow lower EC water to flow into a tank being monitored in order to lower its EC. The BL983322 can also be used to monitor the quality of water from DI tanks or from a distillation apparatus. The BL983322 measures EC from 0.00 to 19.99 S/cm.

### Multicolor LED Indicator

LED changes color based on status.

### Fire Retardant Casing

For additional safety the controllers outer case is made of fire resistant plastic.

### Splash Resistant Cover

A clear plastic cover protects the face panel from dirt and liquids.

### **Adjustable Dry Contact Dosing Relay**

The BL983322 features a dosing relay that is activated when the reading is above a user programmable set point.

### **Programmable Overdose Protection**

For enhanced safety the mini controller can be programmed to deactivate the dosing relay if the set point is not reached within a specified time interval. The overdosing timer is programmable from 5 to 30 minutes or disabled.

### **Relay Control Override**

With the flick of a switch the mini controller's relay can be disabled (Off), placed in control (Auto), or be activated for manual operation (On) which is useful for priming a dosing pump.

### **Multicolor LED Indicator**

Multicolor LED indicator allows an operator to quickly check the status of the controller.

- Green = Meter in measurement mode and reading is below the set point.
- Orange/Yellow = Reading is above the set point and the relay is activated.
- Blinking Red = Indicates an alarm condition such as when the maximum dosing time has been exceeded.

### **Fuse Protected Dosing Contacts**

The relay dosing contact is rated for up to a 2A load and is fuse protected.

### **Labeled Termination Connections**

Quick-connect terminal blocks are clearly labeled for easy connection to power, conductivity probe and relay that can be used to operate a dosing pump, valve, audible alarm, or light.
