

# Magnesium CAL Checker®

## Standards – HI96754-11

SKU: HI 96754-11

---

### RESUMEN

---

The HI96754-11 Magnesium CAL Check® Standards provide a simple solution to calibrating and validating the HI96752 portable pHotometer. This high quality set of standards is manufactured in our state-of-the-art facility and comes supplied with a certificate of analysis. The certificate of analysis provides the lot number, reference values, and expiration date for traceability when certifying the compatible magnesium pHotometer.

- Supplied with Certificate of Analysis
- Standard value of 100 ±5 mg/L magnesium @ 25°C
- Reusable with long shelf life stability
