

Checkridge Remote Sensor Thermometer – HI147-°F Range

Description

The HI147 is a remote temperature ideal for monitoring in food care environments.

It contains magnets for easy placement on a metal surface and delivers high accuracy measurements over a wide temperature range. The thermometer's unique CAL Check™ feature allows for an internal calibration of the device with the flick of a switch, thereby alleviating the time preparing an ice bath.

Features at-a-glance

CAL Check™ – The thermometer's unique CAL Check™ feature allows for an internal calibration of the device with the flick of a switch, thereby alleviating the time preparing an ice bath.

Magnetized – Two magnets located on the back of the device all for easy placement on the outside of a refrigerator or metal cabinet.

Food Compatible Cable – The thermometer is specially designed with a food compatible cable for continuous monitoring of temperature in food care environments.
