

Checktemp®4 Fahrenheit Folding Thermometer – HI151-01

Description

The folding Checktemp®4 provides practical temperature measurement for the food service industry. Special attention was given to the ergonomic form of Checktemp®4. This thermometer fits comfortably and securely in your hand while the LCD on the side of the handle remains easy to see and read. The fast-responding, fold-away probe is made of high-quality stainless steel and can penetrate semi-frozen and semi-solid foods such as meats, ice cream, and cheeses. The Checktemp®4 automatically turns on when the probe is folded open. When finished with measurements, simply wipe the probe clean and fold it away. Checktemp®4 automatically turns off once the probe is returned to its original position so you can safely carry it in your pocket.

Features at-a-glance

CAL Check™

As you unfold the stainless-steel probe, the Checktemp®4 automatically turns on and immediately performs a calibration test. This unique Hanna feature provides the security of knowing you have accurate measurements. CAL Check™ also lets you know if your battery level is low or if your meter requires recalibration.

AISI 316 Stainless Steel Probe

The sharp-tipped penetration probe is composed of stainless steel, providing fast and accurate temperature measurements of a wide variety of samples.

Enhanced Battery Life

The Checktemp®4 uses AA batteries and offers an exceptional 25,000 hours of continuous use.

Auto Shut-off

The battery life of the Checktemp®4 is preserved by this feature which automatically turns the meter off after 8 minutes of non-use.
