

Shockproof Rubber Boot (Green) – HI710030

Description

HI710030 is a green shockproof rubber boot designed for select pH, multiparameter, and temperature meters. The durable rubber casing ensures users have a secure grip on their instrument when using it in the field, factory, or production room floor. The HI710030 rubber boot prevents damage in the case of accidental impact and is able to withstand harsh environmental conditions. This protective boot features an opening for the face of the meter as well as at the bottom for easy access to probe connections. HI710030 is designed to fit Hanna meters that measure 154 x 63 x 30 mm (6.1 x 2.5 x 1.2?).
