

Sonda opdo™ de Repuesto – HI7698494-5

Description

Smart Cap Technology

Automatic Cap Recognition

Hanna's Smart Caps feature a built-in RFID reader that is able to store important data, including manufacture date and first-use date for increased traceability.

Longer Life

Smart Caps last one year from the date of first use. Your meter will automatically count down from initialization and will have your meter remind you when it has expired with an on-screen message.

Aligned Right Every Time

An alignment key ensures that your Smart Cap is on correctly every time.
